

SHREYA RAWANI

Bengaluru, Karnataka | +91 82503 62763 | rawanishreya2020@gmail.com | www.linkedin.com/in/shreya-rawani-703644287

Information Science student seeking a challenging role to apply skills in software development, AI/ML, and cloud technologies while contributing to organizational growth and professional development.

Education

Nitte Meenakshi Institute of Technology (NMIT) Bengaluru, KA

B.E. in Information Science & Engineering | CGPA: 8.95 / 10.0

Sept 2023– Present

CBSE Class XII (PCMC) | KENDRIYA VIDYALAYA BENG DUBI | Grade 93%

July 2022

CBSE Class X | KENDRIYA VIDYALAYA BENG DUBI | Grade 86.8%

July 2020

TECHNICAL SKILLS

Languages: Java, Python, C, C++, R

Fundamentals: DSA, OOP, Computer Networks, Software Engineering and Testing, DBMS

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, CI/CD

Databases: SQL, Firestore

Web Technologies: HTML, CSS

AI/ML: Machine Learning, Explainable AI (SHAP)

Libraries & Frameworks: Scikit-learn, Pandas, NumPy, Matplotlib, Flutter

PROJECTS

Personalized Medicine Recommendation System | Python, Machine Learning, SHAP, SQL

- Developed a hybrid machine learning and rule-based recommendation system for personalized drug prediction using genetic data.
- Implemented Random Forest and Decision Tree models for accurate prediction and analysis.
- Integrated SHAP explainability techniques to improve transparency and interpretability of model predictions.
- Built a scalable data-processing pipeline using Python and SQL for efficient handling of medical datasets.

CI/CD Pipeline Automation System | Jenkins, Docker, Kubernetes, AWS

- Built an end-to-end CI/CD pipeline using Jenkins with GitHub integration for automated build, testing, and deployment.
- Containerized applications using Docker and deployed them on Kubernetes clusters hosted on AWS.
- Integrated automated testing workflows, reducing manual deployment effort and improving reliability.
- Utilized Git and GitHub for version control and collaboration throughout the development lifecycle.

Automated & Secure Voting Verification System | Java, SQL, OOP

- Developed a secure voting verification system using Java and object-oriented programming principles.
- Implemented role-based authentication and voter data validation mechanisms.
- Optimized SQL queries and database operations to improve system performance and response time.
- Designed a modular architecture to ensure maintainability and scalability of the application.

SafeHer – Women's Safety Application | Flutter, Firebase Auth, Firestore

- Developed a women's safety application with SOS alerts, emergency contacts, and real-time safety assistance features.
- Implemented Firebase Authentication and Firestore for secure user management and data storage.
- Built modules including alert history, fake call functionality, safety tips, and emergency contact management.
- Designed a responsive and user-friendly Flutter interface to improve accessibility and enhance user safety during emergencies.

CERTIFICATIONS

- Cloud Computing | **NPTEL** | 2025
- Introduction to Machine Learning | **NPTEL** | 2025
- AWS Academy Cloud Developing | **AWS** | 2026
- Google Cloud Computing Foundation | **Google** | 2025
- Google Cloud Engineering | **Google** | 2025
- Java Database Connectivity | Infosys Springboard | 2025

ACHIEVEMENTS

- Winner** | EMerge 3.0, IIT Hyderabad | 2025 (Secured 1st place by presenting an innovative startup solution before industry experts)
- 2nd Place** | StarPitch, SMVIT | 2025
- 3rd Place** | CodeRed Hackathon, BMSCE | 2025

LEADERSHIP AND EXTRACURRICULAR

Design Core Member | **Google Developer Group**, NMIT

Social Media Co-Lead | **Enigma Entrepreneurship Cell**, NMIT

Member | **National Service Scheme (NSS)**, NMIT and mentors.
